## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 5-14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Channer (U.S. Patent No. 7,036,747) in view of Harris, Jr.

Channer teaches all the limitations of the claims except for the base with a section extending rearwardly from the gel-receiving surface. However, Harris, Jr. discloses an air freshening device 10 having a supporting frame 10 that has a base 20 with a section extending rearwardly (as view from the front of figure 1). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Channer with a section of the base extending rearwardly from the gel-receiving surface as suggested by Harris, Jr. Doing so would provide a stable supporting base (see column 2, lines 12+).

3. Claims 5-14, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Leary (U.S. Patent No. 6,631,852) in view of Harris, Jr.

O'Leary teaches all the limitations of the claims except for a base with section extending rearwardly from the gel-receiving surface. However, Harris, Jr. discloses an air freshening device 10 having a supporting frame 10 that has a base 20 with a section extending rearwardly (as view from the front of figure 1). Therefore, it would have been

obvious to one having ordinary skill in the art to have provided the device of O'Leary with a section of the baser extending rearwardly from the gel-receiving surface as suggested by Harris, Jr. Doing so would provide a stable supporting base (see column 2, lines 12+).

***Response to Arguments***

4. Applicant's arguments filed 3/08/07 have been fully considered but they are not persuasive.
5. Applicant's arguments with respect to claims 5-16 have been considered but are moot in view of the new ground(s) of rejection.
6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
